Art Unit: 1712

1. The following is an examiner's statement of reasons for allowance:

The obviousness-type double patenting rejection over U.S. Patent No. 6,641,923 is rescinded since the patent is the later filed application (the filing date of the patent is July 31, 2001 and effective filing date of the application is February 8, 2001), the applicant could not have filed the conflicting claims in a single application, and an administrative delay on the part of the Office caused the later filed application to issue first. Accordingly, a two-way test for obviousness is required (MPEP § II.B.1.(b)).

The conflicting claims could not have been filed in a single application because the patent requires the additional presence of a boron-containing compound. The specification of the application does not mention a boron-containing compound. Therefore, neither the instant application nor that of the patent could support both the instantly claimed composition without the boron-containing compound and the claims of the patent defining a boron-containing compound.

The Office caused an administrative delay due to a requirement for restriction in parent application no. 09/858,280 (mailed January 21, 2003) which necessitated the filing of the instant divisional application, along with the indication of allowability (mailed January 21, 2004) only after the filing of an appeal brief (filed December 24, 2003).

The obviousness-type double patenting rejection cannot satisfy a two-way test because there is no motivation to incorporate the boron-containing compound of the patent into the composition of the application.

Art Unit: 1712

The sole remaining rejection is the obviousness-type double patenting rejection over application no. 10/288,791. According to MPEP § 822.01, the section entitled "Only Provisional Double Patenting Rejection Remaining in One Application,"

"[i]f the 'provisional' double patenting rejection in one application is the only rejection remaining in that application, the examiner should then withdraw that rejection and permit the application to issue as a patent, thereby converting the 'provisional' double patenting rejection in the other application(s) into a double patenting rejection at the time the one application issues as a patent. See also MPEP § 804.01 and § 822."

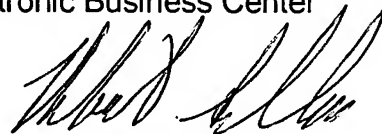

The obviousness-type double patenting rejection involving application no. 10/288,791 is hereby withdrawn, permitting the claims of the instant application to be allowed. The claims of application no. 10/288,791 have yet to be subjected to examination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."
